MOUNTAIN HARVEST

ELEVATED PINE POLLEN

CLINICAL GRADE TINCTURE

A propitiatory, professional strength dual extract of Pine Pollen, Nettle Root, Chen Pi, and Zhi Zi.

Pine Pollen and Nettle Root is a match made in heaven. While Pine Pollen can help supplement the body with Phytoandrogens, Nettle Root promotes a favorable testosterone to estrogen ratio and may help elevate levels of free (active) testosterone by decreasing the activity of sex hormone binding globulin (SHBG).*

To promote Qi circulation and to invigorate the endocrine system, we add just a touch of Chen Pi and Zhi Zi to the formula.* This harmonizes and potentiates the formula. This tincture has been developed by master herbalists.

\$29.95

2 Ounces

KEY BENEFITS

- An exclusive, proprietary clinical grade, true dual extract tincture;
- The potent 1:2 extraction ratio delivers an equivalent of 1.5 grams of whole herbs per serving;
- From our Mountain Harvest Pine Pollen collection;
- Alcohol suspended for quick and easy absorption;
- Made exclusively for RAW Forest Foods in a domestic, FDA cGMP facility;

USE & INGREDIENTS

Tinctures are easy to use, and because they are alcohol based extracts, the active compounds present in them are quickly and efficiently absorbed by the body. Simply add the desired amount to a few ounces of water (or other liquid) and drink.

Our Elevated Pine Pollen Tincture contains of:

Pine Pollen (*Pinus massoniana*): 75%; Nettle Root (*Urtica dioica*): 20%; Chen Pi (*Tangerine peel*): 2.5%; and Zhi Zi (*Gardenia fruit*): 2.5%. Never irradiated and with no fillers or drying agents, you receive a tincture of the highest quality and integrity—only from RAW Forest Foods.
